DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Brossman et al (Pub. No.: US 20030123084)

Regarding claim 1 and 5-6 Brossman et al disclose: A method for building a composite print job, comprising the steps of: receiving first and second files in respective printer independent file formats (note Fig.3, item 325, an MODCA 315, and MODCA 320, where original and shown of Fig.3, the postscript job 305 would be consider as the first job and the user specified job 310 would be consider as the second job, note page 5, paragraph 0042, lines 4-13, the two jobs are received by the virtual printer 215 of Fig.2, in the printer independent or non natively, page 4, paragraph 0037) printing said first and second files to a logical printing device in a printer dependent file format appropriate for a physical printing device (note virtual printer 215 of Fig.2 where the format of the files were changed using the formatter, 225, of virtual printer 215 of Fig.2, note page 4, paragraph 0038, specifically lines 4-7) and combining said first and second files as a composite print job (note page 4, paragraph 0038, where the files were combined) to prepare said first and second files for printing to said physical printing device (note Fig.3, page 5, paragraphs, 0042-0046, where two jobs are transmitted to the presentation device “printer” to

be implemented, note paragraph 0045).

Regarding claim 2 Brossman et al disclose: The method of claim 1, wherein said logical printing device has the same attributes as said physical printing device (note page 3. paragraph 0028, where the synchronization is down between the server and virtual printer and presentation device, note that jobs are being send from the virtual printer to the presentation device because of matching attributes or the transmission would be fatal or results in errors).

Regarding claim 3 Brossman et al disclose: The method of claim 2, further comprising printing said composite print job to said physical printing device (note page 5, paragraphs 0042-0046, where the jobs are transmitted through the virtual printer to the printer or in this case presentation device).

Regarding claim 4 Brossman et al disclose: The method of claim 1, further comprising printing said composite print job to said physical printing device (note Fig.3, page 5, paragraph 0045 where the jobs are sent to the presentation or physical printer 380)

Regarding claim 7 Brossman et al disclose: The medium of claim 6, wherein said logical printing device has the same attributes as said physical printing device (note page 3. paragraph 0028, where the synchronization is down between the server and virtual printer and presentation device, note that jobs are being send from the virtual printer to the presentation device because of matching attributes or the transmission would be fatal or results in errors).

Regarding claim 8 Brossman et al disclose: The medium of claim 7, wherein the method further comprises printing said composite print job to said physical printing device (note page 5, paragraphs 0042-0046, where the jobs are transmitted through the virtual printer to the printer or in this case presentation device).

Art Unit: 2625

Regarding claim 9 Brossman et al disclose: The medium of claim 6, wherein the method further comprises printing said composite print job to said physical printing device (note Fig.3, page 5, paragraph 0045 where the jobs are sent to the presentation or physical printer 380).
